

# **Butterfly Gardening in Florida<sup>1</sup>**

Jaret C. Daniels, Joe Schaefer, Craig N. Huegel, and Frank J. Mazzotti<sup>2</sup>

# Background

Planting a butterfly garden is a great way to beautify your yard and help attract many of the different butterflies found in Florida. Most butterfly gardens are also a magnet for hummingbirds and beneficial insects. A productive butterfly garden does not require a large land area—even a few key plants can make a huge impact.

Whether confined to a patio container or sprawled over several acres, a butterfly garden can be as simple or as complex as you wish to make it. The same basic concepts apply, regardless of the size. The most important thing to understand is that different butterfly species have different requirements, and these requirements change throughout their life cycles. A well-planned butterfly garden should appeal to many different butterflies and also cater to both the adults and their larvae (caterpillars). Proper garden design and choice of plants are essential. Such decisions will help influence which butterflies are attracted, remain in the area, and reproduce there.

The total butterfly garden takes into account the food preferences of both adult butterflies and their larvae (caterpillars). Most adult butterflies feed on flower nectar and will be attracted to a wide variety of different flowers. Their larvae (caterpillars), though, rely on specific plants called host plants for food and are often greatly limited in the number of plants on which they can feed. Host plants may also provide shelter, camouflage, chemicals used for protection, courtship, and reproduction. It is not necessary to include larval host plants to attract butterflies, but adults tend to stay fairly close to the areas where their larval food plants can be found.

All of this requires planning. There are a few basic rules to follow. You can be as creative as you wish, but you must start with a plan that considers the requirements of the butterflies you wish to attract and the plants you will use to lure them.

Butterfly gardening is an exacting (not difficult) pursuit and must be based on butterfly preferences—not human ones. Luckily, butterfly and human favorites are mostly compatible.

# **Butterfly Facts and Biology**

There are more than 765 species of butterflies found in North America north of Mexico. Florida boasts over 180 verified butterfly species representing some 170 native or newly established species and 17 tropical vagrants. Within that mix, around 40 are considered either unique to the state or occur mostly within its boundaries. This diverse butterfly fauna is the highest of any state east of the Mississippi River and helps make Florida a premier location for butterfly gardeners.

All butterflies have a life cycle consisting of four distinct stages: egg, larva (caterpillar), pupa (chrysalis), and adult. Female butterflies lay their eggs on or near an appropriate

larval host plant. The eggs typically hatch within a few days and the small larvae begin to feed. Butterfly larvae have enormous appetites and grow rapidly. To accommodate the change in proportions, each larva will molt or shed its skin several times. The appearance of the larva may change after each molt. When fully grown, the larva seeks a sheltered place. It typically attaches itself with silk to a leaf or twig and it molts for the last time into the pupa. During this stage, the once worm-like caterpillar transforms into a winged adult.

# **Adult Butterfly Resources**

Most adult butterflies found in Florida rely on flower nectar for food. While many tend to be attracted to a variety of available brightly colored blossoms, different butterfly species have distinct color preferences, feeding behaviors, and proboscis lengths. (The butterfly's proboscis is like a long coiled straw used to sip liquid nectar from flowers.) These factors help determine which flowers a butterfly visits. As a rule, small butterflies nectar from small flowers and large butterflies nectar from larger ones. Some butterflies flutter like a hummingbird while feeding, pausing only briefly at each flower. They can often gain access to nectar in long tubular blossoms. Others rest for some time on each blossom. A wide mix of flower colors, shapes, and sizes provides appealing and accessible food to a greater number of butterfly species. It also makes your garden more eye-catching.

Adults of some butterfly species rarely or never visit flowers. They feed instead on tree sap, or the fermenting juices from rotting fruit or plant material, animal dung (droppings), and dead animal remains.

# **Larval Resources**

Larval (caterpillar) host plants are also key ingredients to any well-designed butterfly garden. They are often not as showy as nectar plants, nor are they even necessary to attract adult butterflies. But a garden without larval host plants ignores the requirements of the butterfly's life cycle. While nectar plants invite butterflies into your garden, host plants offer them a reason to stay and reproduce.

Unlike nectar plants though, larval host plants must be tailored to individual butterfly species. So, unless you have acres of land at your disposal, you will need to be selective in your plant choice. Remember also that larval host plants are meant to be eaten. You will see damaged leaves or even some plants that are completely defoliated. Keep in mind that this is a good thing. It means that your butterfly garden is being productive. Within no time, most plants will recover and soon be able to support new larvae. Lastly, don't forget that butterfly larvae feed exclusively on their host plants. They will not cause damage to other landscape plants or become horrible garden pests.

Be careful when buying larval host plants as many nurseries use pesticides. These chemicals can be deadly to butterfly larvae. When in doubt, always ask if the plants you wish to purchase have been treated with pesticides. Similarly, be very careful when using pesticides in your garden. If you must use chemicals to control pest insects, use them sparingly and only treat the infected plant.

# **Planning Your Garden**

Planting a productive butterfly garden is not hard, but it does require proper planning and a little basic research. Although Florida boasts over 180 different butterflies, you can't attract species that do not naturally occur in your region, nor can you grow plants that aren't adapted to the soils and climate in your region. To help get started, follow these easy steps to plan your garden.

## YOUR BUTTERFLY REGION MAP

Look at the map provided (Figure 1) and determine the region in which you live.

#### Figure 1.

### YOUR BUTTERFLY REGION TABLE(S)

Then, look for your region in the Florida butterflies tables (Tables 1-6), highlight the species that occur in your area, and use habitats that can be found within 1/4 mile of the site you are considering for your butterfly garden.

**Butterfly nectar plants by region.** Table 7 lists butterfly nectar plants for North and Central Florida (regions 1-4). Table 8 lists butterfly nectar plants for South Florida (regions 5-7).

#### **KEYS TO USING THE TABLES**

**Determine the larval and adult foods for each species from the tables.** Butterflies tend to stay fairly close to the areas where their natural larval food plants can be found.

The "flight season" indicates the months when the adults are active.

Note: If you are not interested in trying to attract the greatest variety of butterflies, you can select plants from the butterfly nectar sources listed at the end of this publication. This approach will help you to create a beautiful garden that also is appealing to some butterfly species.

#### **KEYS TO THE TABLES**

SPECIES	REGIONS	HABITATS	FLIGHT SEASON
	1		
Pipevine Swallowtail (Battus philenor)	1-6	fields, gardens, wetlands, woodlands	Feb-Nov
<b>Larval Host Plants</b> : Herbaceous plants and vines (Aristo Dutchman's Pipevine ( <i>Aristolochia tomentosa</i> )	olochiaceae) incl	uding Virginia Snakeroot (Aristolochia serpentar	ia) and Woolly
Adult Food Resources: Flower nectar			
Polydamus Swallowtail (Battus polydamus)	2-7	disturbed areas, urban parks, gardens, fields	All year
<b>Larval Host Plants</b> : Native and non-native vines (Aristo Flower ( <i>Aristolochia littoralis</i> )	lochiaceae) inclu	iding Woolly Dutchman's Pipevine (Aristolochia	tomentosa) and Calico
Adult Food Resources: Flower nectar			
Zebra Swallowtail (Eurytides marcellus)	1-6	scrubs, woodlands, fields, pastures	Feb-Dec
Larval Host Plants: Shrub Annonaceae—Pawpaw (Asir			
Adult Food Resources: Flower nectar. Adults have show	rt proboscis		
	1	1	
Black Swallowtail (Papilio polyxenes)	1-7	wetlands, open areas, gardens, fields, roadsides	Feb-Nov
<b>Larval Foods</b> : Herbaceous plants—wild and cultivated and Mock Bishopsweed ( <i>Ptilimnium capillaceum</i> )	Apiaceae includi	ing Sweet Fennel ( <i>Foeniculum vulgare</i> ), Parsley (	Petroselinum crispum),
Adult Food Resources: Flower nectar			
Giant Swallowtail (Heraclides [Papilio] cresphontes)	1-7	open areas, forest margins, citrus groves	Feb-Nov
<b>Larval Foods</b> : Shrubs and Trees (Rutaceae) including Co ( <i>Zanthoxylum clava-herculis</i> ), and cultivated citrus ( <i>Citru</i>		(Ptelea trifoliata), Wild Lime (Zanthoxylum fagar	a), Hercules-club
Adult Food Resources: Flower nectar			
Schaus' Swallowtail ( <i>Heraclides [Papilio] aristodemus ponceanus)</i> – endangered (federal and state)	6-7	tropical hardwood hammocks	May-July
Larval Host Plants: Trees—(Rutaceae) including Torchy	vood (Amyris eler	nifera) and Wild Lime (Zanthoxylum fagara)	
Adult Food Resources: Flower nectar			
Eastern Tiger Swallowtail (Papilio glaucus)	1-6	woodlands, forest margins, stream corridors, parks, gardens	Mar-Nov
Larval Foods: Trees—Ash (Fraxinus spp.), Black Cherry (	Prunus serotina),	Tuliptree ( <i>Liriodendron tulipifera</i> ), Sweetbay ( <i>ma</i>	ignolia virginiana)
Adult Food Resources: Flower nectar			
Spicebush Swallowtail (Papilio troilus)	1-7	forest margins, wetlands, fields, gardens	Feb-Nov
Larval Host Plants: Trees—Bays (Persea spp.), Sassafras	(Sassafras albidu	ım); Shrubs - Spicebush ( <i>Lindera benzoin</i> )	
Adult Food Resources: Flower nectar			
Palamedesl Swallowtail (Papilio palamedes)	1-6	swamps, wetlands, woodlands, forest margins	Feb-Nov
Larval Host Plants: Trees—Bays (Persea spp.) including	Red Bay (Persea	borbonia)	
Adult Food Resources: Flower nectar			

Table 2. Whites and Sulphurs (Family Pieridae	2)		
SPECIES	REGIONS	HABITATS	FLIGHT SEASON
Florida White (Appias drusilla)	5-7	tropical hardwood hammocks	All year
Larval Host Plants: Shrubs—Bayleaf Capertree (	Capparis flexuosa) a	and Guiana Plum (Drypetes lateriflora)	
Adult Food Resources: Flower nectar			
Checkered White (Pontia protodice)	1-7	disturbed sites, fields, roadsides, fallow agricultural land	Feb-Nov
Larval Host Plants: Herbaceous Plants—Mustar	ds (Brassicaceae) in	cluding Virginia Peppergrass (Lepidium virginicum	n)
Adult Food Resources: Flower nectar			
Cabbage White ( <i>Pieris rapae</i> )	1-7	gardens, fields, disturbed sites, roadsides	Feb-Nov
Larval Host Plants: Herbaceous Plants—wild an (Brassica oleracea)	d cultivated Brassic	caceae including Virginia Peppergrass ( <i>Lepidium vi</i>	irginicum), Cabbage
Adult Food Resources: Flower nectar			
Great Southern White (Ascia monuste)	2-7	beaches, salt marshes, coastal strand, disturbed sites	All year
lanceolata); Shrubs—Bayleaf Capertree (Capparis		dium virginicum), Saltwort (Batis maritima), Coasta	l Searocket ( <i>Cakile</i>
Adult Food Resources: Flower nectar			
Orange Sulphur ( <i>Colias eurytheme</i> )	1-7	open areas, roadsides, disturbed sites, alfalfa fields	Mar-Dec
Larval Host Plants: Herbaceous Plants—(Fabace	eae) including Whit	e Sweetclover ( <i>Melilotus albus</i> ) and Alfalfa ( <i>Medico</i>	ago sativa)
Adult Food Resources: Flower nectar			
Southern Dogface (Zerene cesonia)	1-6	sandhills, scrub, flatwoods	All year – adults overwinter
Larval Host Plants: Herbaceous plants—Summe	er Farewell ( <i>Dalea p</i>	innata); Shrubs—Bastard Indigo (Amprpha frutico	sa)
Adult Food Resources: Flower nectar			
Large Orange Sulphur (Phoebis agarithe)	4-7	tropical hardwood hammocks, open sites, gardens	All year
Larval Host Plants: Trees—(Fabaceae) including False Tamarind ( <i>Lysiloma latisiliquum</i> )	Florida Keys Blackl	bead (Pithecellobium keyense), Catclaw (Pithecellob	<i>pium unguis-cati</i> ), and
Adult Food Resources: Flower nectar			
Cloudless Sulphur (Phoebis sennae)	1-7	open areas, gardens, beaches, parks	All year
Larval Host Plants: Herbaceous Plants and shrul (Chamaecrista nictitans), and various native and r		luding Partridge pea ( <i>Chamaecrista fasciculata</i> ), S Senna spp.)	ensitive Pea
Adult Food Resources: Flower nectar			
Orange-barred Sulfur (Phoebis philea)	2-7	gardens, parks, open areas	All year
Larval Host Plants: Shrubs and trees—(Fabacead	e, including hallve	and non-hauve sennas ( <i>senna</i> spp.)	
Adult Food Resources: Flower nectar			
Lucido Sulphur (Kricogonia lucido)	57	coastal strand gardons beaches	Mar Nov
Lyside Sulphur (Kricogonia lyside)	5-7 Inctum)	coastal strand, gardens, beaches	Mar-Nov

SPECIES	REGIONS	HABITATS	FLIGHT SEASON
Adult Food Resources: Flower nectar			
Statira Sulphur (Aphrissa [Phoebis] statira)	3-7	coastal areas, wetlands, gardens	All year
Larval Host Plants: Shrubs—Coinvine (Dalbergia eca	staphyllum)		
Adult Food Resources: Flower nectar			
Barred Yellow (Eurema daira)	1-7	beaches, scrub, disturbed areas, fields, roadsides, fallow agricultural land	All year – adults overwinter
<b>Larval Host Plants</b> : Herbaceous plants—(Fabaceae) Sticky Jointvetch ( <i>Aeschynomene viscidula</i> )	including Pencil	flower (Stylosanthes biflora), Shyleaf (Aeschynor	<i>ene americana</i> ) and
Adult Food Resources: Flower nectar			
Little Yellow (Eurema lisa)	1-7	disturbed areas, open areas, open woodlands, scrubs, fields	All year
<b>Larval Host Plants</b> : Herbaceous plants—(Fabaceae) <i>nictitans</i> )	including Partric	Ige Pea (Chamaerista fasciculata) and Sensitive F	Pea (Chamaecrista
Adult Food Resources: Flower nectar			
Dina Yellow ( <i>Eurema dina</i> )	6-7	tropical hardwood hammock margins and adjacent open areas	All year
Larval Foods: Shrubs and Trees—(Picramniaceae) ind	luding Mexican	Alvaradoa (Alvaradoa amorphoides)	
Adult Food Resources: Flower nectar			
Mimosa Yellow (Eurema nise)	6-7	forest margins	All year
<b>Larval Host Plants</b> : Herbaceous Plants and Trees—(F <i>latisilquum</i> )	abaceae) includ	ing Sensitive plant ( <i>Mimosa pudica</i> ) and False Ta	marind ( <i>Lysiloma</i>
Adult Food Resources: Flower nectar			
Sleepy Orange (Eurema nicippe)	1-7	fields, forest margins, scrub, sandhills, roadsides, fallow agricultural land	All year – adults overwinter
Larval Host Plants: Herbaceous Plants—(Fabaceae) i	ncluding Sickler	ood Senna ( <i>Senna obtusifolia</i> )	
Adult Food Resources: Flower nectar			
Dainty Sulfur ( <i>Nathalis iole</i> )	1-7	disturbed areas, pastures, roadsides	All year
Larval Foods: Herbaceous Plants—including Spanish	n Needles (Biden	s alba) and Indian Chickweed (Mollugo verticillat	a)
Adult Food Resources: Flower nectar			

## Table 3. Gossamer-wing Butterflies (Family Lycaenidae)

SPECIES	REGIONS	HABITATS	FLIGHT SEASON
Harvester (Feniseca tarquinius)	1-4	wetlands, swamps	Feb-Nov
Larval Host: Larvae are carnivorous and feed of	on Woolly Aphid	Is that utilize Smilax spp. and Alnus spp.	
Adult Food Resources: Aphid honeydew			
Atala (Eumaeus atala)	5-7	tropical pine rocklands, tropical hardwood hammocks, parks, gardens	All year
Larval Host Plants: Shrubs—(Zamiaceae) inclu	uding Coontie (2	Zamia pumila)	
Adult Food Resources: Flower nectar			
Great Purple Hairstreak (Atlides halesus)	1-5	woodlands, wetlands, adjacent open areas	All year
Larval Host Plants: Shrub—Oak Mistletoe (Pho	oradendron leuc	carpum)	
Adult Food Resources: Flower nectar			
Amethyst Hairstreak (Chlorostrymon maesites)	6-7	tropical hardwood hammocks and their margins	All year
Larval Host Plants: Unknown	1		
Adult Food Resources: Flower nectar			
Silver-banded Hairstreak (Chlorostrymon simaethis)	6-7	tropical hardwood hammocks and their margins	All year
Larval Host Plants: Vines—(Sapindaceae) inclu	uding Heartsee	d (Cardiospermum corindum)	
Adult Food Resources: Flower nectar			
Coral Hairstreak ( <i>Harkenclenus</i> [Satyrium] titus)	1	woodlands and forest margins	Mar-May
Larval Host Plants: Trees—(Rosaceae) includir	ng Black Cherry	(Prunus serotina)	
Adult Food Resources: Flower nectar			
Banded Hairstreak (Satyrium calanus)	1-4	woodlands, scrubs, and forest margins	Feb-Apr
Larval Host Plants: Trees—including hickory (	Carva spp.) and		•

#### Table 4. Metalmark Butterflies (Family Riodinidae)

SPECIES	REGIONS	HABITATS	FLIGHT SEASON	
Little Metalmark (Calephelis virginiensis)	1-7	Wetlands, roadsides, pine savannas, open woodlands	Mar-Nov	
Larval Host Plants: Herbaceous Plants—Yel	low Thistle (Cirsiu	m horridulum)		
Adult Food Resources: Flower nectar				

SPECIES	REGION	HABITATS	FLIGHT SEASON
Snout Butterfly (Libytheana carinenta)	1-6	wetlands, woodlands, forest margins, parks	Feb-Nov
Larval Host Plants: Trees—Sugarberry	(Celtis laevigata)		
Adult Food Resources: Flower nectar			
Gulf Fritillary (Agraulis vanillae)	1-7	roadsides, disturbed sites, gardens, parks, coastal areas, forest margins	All year
Larval Host Plants: Vines—(Passiflorac suberosa)	eae) including Purple	Passionflower (Passiflora incarnata) and Corkystem Passionf	lower (Passiflora
Adult Food Resources: Flower nectar			
Julia ( <i>Dryas iulia</i> )	4-7	tropical hardwood hammock margins, gardens, disturbed sites	All year
Larval Host Plants: Vines—(Passiflorad	eae) including Corky	stem Passionflower (Passiflora suberosa)	
Adult Food Resources: Flower nectar			
Zebra Longwing (Heliconius charithonia)	1-7	open woodlands, forest margins, gardens, parks	All year
Larval Host Plants: Vines—(Passiflorad suberosa)	eae) including Purple	Passionflower (Passiflora incarnata) and Corkystem Passionf	lower (Passiflora
Adult Food Resources: Flower nectar a	and pollen		
Variegated Fritillary (Eupioeta claudia)	1-7	fields, disturbed sites	All year
Larval Host Plants: Herbaceous plants	and Vines—including	g Purple Passionflower ( <i>Passiflora incarnata</i> ) and violets ( <i>Vio</i>	<i>la</i> spp.)
Adult Food Reources: Flower nectar			
Silvery Checkerspot (Chlosyne nycteis)	1	stream corridors, open woodlands, wetland margins	Feb-Nov
	—(Asteraceae) includ	ing Woodland Sunflower (Helianthus divaricatus)	
Adult Food Resources: Flower nectar			
Seminole Crescent (Anthanassa [Phyciodes] texana seminole)	1-3	wetlands, stream corridors, swamp margins	Mar-Nov
Larval Host Plans: Herbaceous Plants-	—Waterwillow (Justici	a ovata)	
Adult Food Resources: Flower nectar			
Cuban Crescent (Anthanassa [Phyciodes] frisia)	5-7	coastal areas, tropical hardwood hammock, margins, gardens	All year
Larval Host Plants: Herbaceous Plants	—(Acanthaceae) Sixa	ngle Foldwing (Dicliptera sexangularis)	
Adult Food Resources: Flower nectar			
Phaon Crescent (Phyciodes phaon)	1-7	roadsides, wetlands, pond margins, wet ditches, disturbed sites	All year
Larval Host Plants: Herbaceous Plants	—Turkey Tanglr Fogfr	uit (Phyla nodiflora)	
Adult Food Rsources: Flower nectar			
Pearl Crescent (Phyciodes tharos)	1-6	open woodlands, fields, roadsides, disturbed sites	All year
Larval Host Resources: Herbaceous Pl	ants—(Asteraceae) (S	ymphyotrichum spp.)	
Adult FoodRsources: Flower nectar			

Table 5. Brush-footed Butterflies (Family Nymphalidae)

SPECIES	REGION	HABITATS	FLIGHT SEASON
Question Mark (Polygonia interrogationis)	1-4	woodlands, forest margins	All year
Larval Host Plants: Trees—Sugarberry	<i>ı (Celtis laevigata</i> ) and	Winged Elm ( <i>Ulmus alata</i> )	
Adult Food Resources: Tree sap, rottin	g fruit		
Eastern Comma (Polygonia comma)	1-2	deciduous forests, wetlands, fields	All year
Larval Host Plants: Trees—Elms (Ulmu	<i>is</i> spp.); Herbaceous P	lantsNettles (Urticaceae)	
Adult Food Resources: Tree sap, rottin	ig fruit		
Mourning Cloak (Nymphalis antiopa)	1-2	woodlands, swamps, wetlands	Feb-Nov
Larval Host Plants: Trees—Elms (Ulmu	is spp) and Willows (Se	alix spp.)	
Adult Food Resources: Tree sap, rottin	ig fruit		
		1	
American Painted Lady (Vanessa virginiensis)	1-7	disturbed sites, forest margin, fields, gardens	Feb-Nov
Larval Host Plants: Herbaceous Plants	—(Asteraceae) Cudw	eeds (Gamochaeta [Gnaphalium] spp.)	
Adult Food Resources: Flower nectar			
		1	
Red Admiral (Vanessa atalanta)	1-7	open woodlands, wetlands, disturbed sites	All year
Larval Host Plants: Herbaceous Plants		neria cylindrica), Florida Pellitory (Parietaria floridana), and N	ettles (Urtica spp.)
Adult Food Resources: Flower nectar,	tree sap, and rotting f	fruit	
		1	
Common Buckeye (Junonia coenia)	1-7	forest margins, roadsides, fields, disturbed sites, gardens	All year
Larval Host Plants: Herbaceous Plants spp.), Turkey Tangle Fogfruit ( <i>Phyla nod</i>		spp.), Twinflower ( <i>Dyschoriste</i> spp.), Toadflax ( <i>Linaria</i> spp.), F	alse Foxglove ( <i>Agalinus</i>
Adult Food Resources: Flower nectar,	rotting fruit		
Mangrove Buckeye (Junonia evarete)	5-7	mangrove swamps, salt marshes, adjacent coastal areas	All year
Larval Host Plants: Trees—Black Mane	grove ( <i>Avicennia germ</i>	inans)	
Adult Food Resources: Flower nectar			
Tropical Buckeye (Junonia genoveva)	6-7	coastal area, disturbed sites	All year
Larval Host Plants: Herbaceous Plants	Blue Porterweed (	Stachytarpheta jamaicensis)	
Adult Food Resources: Flower nectar			
		1	
White Peacock (Anartia jatrophae)	2-7	wetlands, roadsides, cannals, wet ditches, disturbed sites	All year
	-Waterhyssop (Bacc	pa monieri) and Turkey Tangle Fogfruit (Phyla nodiflora)	
Adult Food Resources: Flower nectar			
Malachite (Siproeta stelenes)	5-7	tropical hardwood hammock, shrubby sites, disturbed sites	All year
Larval Host Plants: Herbaceous Plants		t (Blechum pyramidatum)	
Adult Food Resources: Flower nectar,	rotting fruit		
Red-spotted Purple (Basilarchia [Limenitis] arthemis astyanax)	1-3	secondary-growth woodlands, forest margins, swamps, wetlands	Mar-Oct
Larval Host Plants: Trees—Black Cher	ry (Prunus serotina), Ca	arolina Willow (Salix caroliniana); Shrubs—Deerberry (Vaccir	nium stamineum)

SPECIES	REGION	HABITATS	FLIGHT SEASON
Adult Food Resources: Flower nectar,	rotting fruit		
Viceroy (Basilarchia [Limenitis] archippus)	1-6	wetlands, marshes	Mar-Nov
Larval Host Plants: Trees—Willows (Se	alix spp.)		
Adult Food Resources: Flower nectar,	rotting fruit		
Florida Purplewing (Eunica tatila)	7	tropical hardwood hammocks	All year
Larval Host Pants: Trees—Crabwood	(Gymnanthes lucida)		
Adult Food Resources: Tree sap, rottin	ng fruit		
	1		
Dingy purplewing	6-7	tropical hardwood hammocks and margins	All year
Larval Foods: Trees—Gumbo Limbo (A	Bursera simaruba)		
Adult Food Resources: Tree sap, rottin	ng fruit		
	1		I
Ruddy Daggerwing ( <i>Marpesia petreus</i> )	4-7	tropical hardwood hammocks, wetlands	All year
Larval Host Plants: Trees—Strangler F	ig (Ficus aurea)		
Adult Food Resources: Flower nectar,	tree sap, rotting fruit		
	1		
Goatweed Leafwing (Anaea andrea)	1-3	woodlands, pinelands	All year
Larval Host Plants: Herbaceous Plants	s—Silver Croton (Crot	on argyranthmus) and Woolly Croton (Croton capitatus)	
Adult Food Resources: Tree sap, rottin	ng fruit		
			1
Florida Leafwing (Anaea troglodyte floridalis)	6-7	tropical pine rocklands	All year
Larval Host Plants: Pineland Croton (	Croton linearis)		
Adult Food Resources: Tree sap, rottin	ng fruit		
			1
Hackberry Emperor ( <i>Asterocampa celtis</i> )	1-5	woodlands, stream corridors, parks, forest margins	Mar-Nov
Larval Host Plants: Trees—Sugarberr	y (Celtis laevigata)		
Adult Food Resources: Tree sap, rottin	ng fruit		
			1
Tawny Emperor (Asterocampa clyton)	1-6	woodlands, stream corridors forest margins, parks	Mar-Nov
Larval Host Plants: Trees—Sugarberr	y (Celtis laevigata)		
Adult Food Resources: Tree sap, rottin	ng fruit		
	1		I
Southern Pearly-Eye ( <i>Enodia portlandia</i> )	1-3	wetlands, moist woodlands, stream corridors, canebrakes	Feb-Nov
Larval Host Plants: Grasses (Poaceae)	—Switchcane (Arund	inaria gigantea)	
Adult Food Resources: Sap, rotting fr	uit, and vegetation		
Appalachian Brown (Satyrodes appalachia)	1-4	moist woodlands, swamps, stream corridors	Mar-Nov
Larval Host Pants: Sedges (Cyperacea	ie)		
Adult Food Resources: Sap, rotting fro	uit, and vegetation		

SPECIES	REGION	HABITATS	FLIGHT SEASON
Gemmed Satyr (Cyllopsis gemma)	1-4	moist woodlands, stream corridors, swamps	Mar-Nov
Larval Host Plants: Grasses (Poaceae-	-including Slender W	oodoats Chasmanthium laxum)	
Adult Food Resources: Tree sap			
Georgia Satyr ( <i>Neonympha areolata</i> )	1-6	marginal wetlands, moist woodlands, pine savannas, wet ditches	Mar-Nov
Larval Host Plants: Grasses (Poaceae)	and Sedges (Cyperace	eae)	
Adult Food Resources: Unknown			
Carolina Satyr (Hermeuptychia sosybius)	1-7	woodlands, forest margins, wetlands, adjacent open areas	All year
Larval Host Plants: Grasses (Poaceae)	—including St. Augus	tinegrass (Stenotaphrum secundatum)	
Adult Food Resources: Flower nectar,	sap		
Little Wood Satyr (Megisto cymela)	1-4	woodlands, forest margins, swamps	Mar-May
Larval Host Plants: Grasses (Poaceae)			
Adult Food Resources: Sap, rotting fru	uit and vegetation		
Common Wood Nymph ( <i>Cercyonis pegala</i> )	1-4	woodlands, forest margin, swamps	Jul-Sep
Larval Host Plants: Grasses (Poaceae)			
Adult Food Resources: Flower nectar,	sap, rotting fruit and	vegetation	
Monarch (Danaus plexippus)	1-7	open areas, fields, gardens, disturbed sites, parks, scrubs, pastures, marshes	All year
		weeds (Asclepias spp.) including Pineland Milkweed (Asclep d (Asclepias incarnata), Butterfly Weed (Asclepias tuberosa)	<i>ias humistrata</i> ), White
Adult Food Resources: Flower nectar			
Queen (Danaus gilippus)	1-7	open pinelands, forest margins, fields, marshes, pastures, gardens, parks	All year
		weeds ( <i>Asclepias</i> spp.) including Pineland Milkweed ( <i>Asclep</i> d ( <i>Asclepias incarnata</i> ); Vines—White Twinvine ( <i>Sarcostemme</i>	
Adult Food Resources: Flower nectar			
Soldier (Danaus eresimus)	4-7	marshes, gardens, open areas, disturbed sites, pastures, parks	All year
Larval Host Plants: Herbaceous plants	s (Apocynaeae)—Milk	weeds (Asclepias spp.).; Vines—White Twinvine (Sarcostemn	na clausum)
Adult Food Resources: Flower nectar			

#### Table 6. Skippers (Family Hesperiidae)

	REGIONS	HABITATS	FLIGHT SEASON
Silver-spotted Skipper	1-7	woodlands, forest margin, swamps, gardens	Mar-Nov
Epargyreus clarus)			
L <b>arval Host Plants:</b> Vines—includ ( <i>Apios americana</i> ); Shrubs—Bastar		gpeanut (Amphicarpeae bracteata), American Wisteria (Wisteria f a fruticosa)	rutescens), and Groundnu
Adult Food Resources: Flower ne	ctar		
Mangrove Skipper (Phocides pigmalion)	4-7	mangroves, coastal areas	All year
Larval Host Plants: Trees—Red M	langrove ( <i>Rhizoph</i>	nora mangle)	
Adult Food Resources: Flower ne	ctar		
Hammock Skipper ( <i>Polygonus leo</i> )	6-7	tropical hardwood hammocks and margins, parks, gardens	All year
Larval Host Plants: Jamaican Dog	gwood ( <i>Piscidia pis</i>	scipula)	
Adult Food Resources: Flower ne	ctar		
Long-tailed Skipper ( <i>Urbanus</i> proteus)	1-7	open areas, disturbed sites, forest margins, parks, garder	ns All year
<b>Larval Host Plants:</b> Herbaceous p Butterfly Pea ( <i>Centrosema</i> spp.), an		–including Ticktrefoil ( <i>Desmodium</i> spp.); Vines—American Wiste	ria (Wisteria americana),
Adult Food Resources: Flower ne	-		
Dorantes Longtail ( <i>Urbanus</i>	1-7	woodland margins, disturbed sites, roadsides, gardens	All year
dorantes)			, iii year
		ncluding Ticktrefoil ( <i>Desmodium</i> spp.)	
Adult Food Resources: Flower ne	ctar		
Golden Banded-Skipper (Autochton cellus)	1-2	moist woodlands, forest margins, wetlands	Mar-Nov
Larval Host Plants: Vines—includ	ling American Hog	gpeanut (Amphicarpeae bracteata)	
Adult Food Resources: Flower ne	ctar		
Hoary Edge (Achalarus lyciades)	1-2	woodlands, forest margins	Mar-Nov
Larval Host Plants: Herbaceous P	lants—Ticktrefoil	(Desmodium spp.); Vines—Atlantic Pigeonwings (Clitoria marian	a)
Adult Food Resources: Flower ne	ctar		
Southern Cloudywing (Thorybes	1-4	dry woodlands, forest margins, gardens	Mar-Oct
bathyllus)			
		(Desmodium spp.); Vines—Atlantic Pigeonwings (Clitoria marian	a)
Adult Food Resources: Flower ne	ctar		
Northern Cloudywing (Thorybes	1-5	dry woodlands, forest margins, gardens	Mar-Nov
pylades)			
<i>pylades</i> ) <b>Larval Host Plants:</b> Herbaceous P and Milkpea ( <i>Galactia</i> spp.)	lants—Ticktrefoil	( <i>Desmodium</i> spp.); Vines—Groundnut ( <i>Apios americana</i> ), Butter	fly Pea ( <i>Centrosema</i> spp.),

SPECIES	REGIONS	HABITATS	FLIGHT SEASON
Confused Cloudywng ( <i>Thorybes</i> <i>confusis</i> )	1-4	dry woodlands, forest margins	Mar-Oct
Larva Host Plants: Herbaceous Pl	ants (Fabaceae) in	cluding Bush Clover ( <i>Lespedeza</i> spp.)	
Adult Food Resources: Flower ne	ctar		
Hayhursts Scallopwing (Staphylus hayhurstii)	1-6	woodlands, forest margins	Feb- Nov
Larval Host Plants: Herbaceous P	lant: Jubas Bush (/	Iresine diffusa)	
Adult Food Resources: Flower ne	ctar		
	1		I
Florida Duskywing (Ephyriades brunneus)	6-7	tropical pine rocklands, hardwood hammock margins	All year
Larval Host Plants: Shrub—Long		Byrsonima lucida)	
Adult Food Resources: Flower ne	ctar		
Junevals Duskywing (Erynnis juvenalis)	1-5	dry woodlands, forest margins, adjacent open areas	Jan-Mar
Larval Host Plants: Trees—Oaks (			
Adult Food Resources: Flower ne	ctar		
	1.5		
Sleepy Duskywing ( <i>Erynnis brizo</i> )	1-5	dry woodlands, forest margins, adjacent open areas	Jan-Mar
Larval Host Plants: Trees—Oaks ( Adult Food Resources: Flower ne			
Aduit Food Resources: Flower ne	Clar		
Horaces Duskywing (Erynnis horatius)	1-7	woodlands, forest margins, swamps, adjacent open areas	Feb-Oct
Larval Host Plants: Trees—Oaks (	Quercus spp.)		
Adult Food Resources: Flower ne	ctar		
Mottled Duskywing (Erynnis martialis)	1	dry woodlands, forest margins, adjacent open areas	Mar-Sep
Larval Host Plants: Shrub—New	Jersey Tea ( <i>Ceano</i>	thus americanus)	
Adult Food Resources: Flower ne	ctar		
			1
Zarucco Duskywing ( <i>Erynnis</i> <i>zarucco</i> )	1-7	woodlands, forest margins, wetland edges, adjacent open areas	Feb-Nov
Larval Host Plants: Herbaceous P	lants—Wild White	e Indigo ( <i>Baptisia alba</i> ) and Blatterpod ( <i>Sesbania vesicaria</i> ); Vines –	Milkpea ( <i>Galactia</i> spp.)
Adult Food Resources: Flower ne	ctar		
Wild Indigo Duskywing (Erynnis baptisiae)	1-2	dry woodlands, forest margins	Mar-Oct
•	lants (Fabaceae)—	-Wild White Indigo (Bapisia alba) and Carolina Indigo (Indigofera c	aroliniana)
Adult Food Resources: Flower ne	ctar		
Common Sootywing (Pholisora catullus)	1-3	disturbed sites, pastures, fallow agricultural land, gardens	Mar-Oct
	lants (Amarantha	ceae)—Lambs Quarters (Chenopodium album)	
Adult Food Resources: Flower ne		· · ·	

SPECIES	REGIONS	HABITATS	FLIGHT SEASON
Common Checkered-Skipper (Pyrgus communis)	1-4	disturbed sites, roadsides, fields, pastures	Feb-Nov
	ants (Malvaceae)—Cub	oan Jute ( <i>Sida rhombifolia</i> ) and Common Fanpetals ( <i>Sida acut</i>	a)
Adult Food Resources: Flower nee	ctar		
White Checkered-Skipper (Pyrgus	1-6	disturbed sites, roadsides, fields, pastures	Feb-Nov
albescens)			<u> </u>
		oan Jute ( <i>Sida rhombifolia</i> ) and Common Fanpetals ( <i>Sida acut</i>	a)

Common Name	Scientific Name	Flowering Season
TREES		
Eastern Redbud	Cercis canadensis	Spring
Dahoon Holly	llex cassine	Spring
Chickasaw Plum	Prunus angustifolia	Spring
Hog Plum	Prunus umbellata	Spring
Sparkleberry	Vaccinium arboreum	Spring
Walters Viburnum	Viburnum abovatum	Spring
SHRUBS		
Bastard Indigo	Amorpha fruticosa	Summer-Fall
Buttonbush	Cephalanthus occidentalis	Spring-Summer
New Jersey Tea	Ceanothus americanus	Spring
Summersweet	Clethra alnifolia	Summer
Garberia	Garberia heterophylla	Summer-Fall
Firebush	Hamelia patens	Summer-Fall
Inkberry	llex glabra	Spring-Summer
Wild Azalea	Rhododendron canescens	Spring
Florida Flame Azalea		
	Rhododendron austrinum	Spring
WILDFLOWERS	A = - [:	Fall
False Foxglove	Agalinus spp.	
Pink Swamp Milkweed	Asclepias incarnata	Summer-Fall
White Swamp Milkweed	Asclepias perennis	Summer-Fall
Butterfly Milkweed	Asclepias tuberosa	Spring-Summer
Aster	Aster spp.	Summer-Fall
Florida Paint Brush	Carphephorus corymbosus	Fall
Vanilla Plant	Carphephorus odoratissimus	Fall
Golden Aster	Chrysopsis spp.	Fall
Mistflower	Conoclinium coelestinum	Summer-Fall
Dalea	Dalea spp.	Fall
Purple Coneflower	Echinacea purpurea	Summer
Elephants-foot	Elepjantopus elatus	Summer-Fall
Snakeroot	Eryngium aquaticum	Summer
Mistflower	Eupatorium coelestinum	Summer-Fall
Joe-pye Weed	Eupatorium fistulosum	Summer-Fall
Blanket Flower	Gaillardia pulchella	Summer-Fall
Coastal Vervain	Glandularia maritima	Summer
Narrow-leaf Sunflower	Helianthus angustifolius	Summer-Fall
Beach Sunflower	Helianthus debilis	Summer-Fall
Scarlet Hibiscus	Hibiscus coccineus	Summer-Fall
Redroot	Lachnanthes caroliana	Summer-Fall
Blazing Star	Liatris spp.	Summer-Fall
Cardinal Flower	Lobelia cardinalis	Summer-Fall
Snow Squarestem	Melanhera nivea	Summer-Fall
Hempweed	Mikania scandens	Fall
Horsemint	Monarda punctata	Fall
Turkey Tangle Fogfruit	Phyla nodiflora	Spring-Fall

Common Name	Scientific Name	Flowering Season
Black-eyed Susan	Rudbeckia hirta	Summer-Fall
Yellow Coneflower	Ratibida pinnata	Summer-Fall
Cut-leaved Coneflower	Rudbeckia lanciniata	Summer-Fall
Wild Petunia	Ruellia caroliniensis	Spring-Fall
Salvia (Sage)	Salvia spp.	Summer-Fall
Rosinweed	Silphium asteriscus	Summer-Fall
Goldenrod	Solidago spp.	Summer-Fall
Stokes' Aster	Stokesia laevis	Summer-Fall
Ironweed	Vernonia spp.	Summer

#### Table 8. Native Butterfly Nectar Plants. South Florida: Regions 5-7.

Common Name	Scientific Name	Flowering Season
	TREES	
Geiger Tree	Cordia sebestena	Summer-Winter
	SHRUBS	
Buttonbush	Cephalanthus occidentalis	Summer
Buttonwood	Conocarpus erectus	Spring-Summer
Firebush	Hamelia patens	All year
Buttonsage	Lantana involucrata	Summer-Winter
Wild Coffee	Psychotria nervosa	Spring
Necklace Pod	Sophora tomentosa	Summer-Winter
PERENNIALS		
Mistflower	Conoclinium coelestinum	Summer-Fall
Beach Sunflower	Helianthus debilis	All Year
Scorpion-tail	Heliotropium angiospermum	All Year
Snow Squarestem	Melanhera nivea	All Year
Turkey Tangle Fogfruit	Phyla nodiflora	All Year
Blue Porterweed	Stachytarpheta jamaicensis	Spring
